

Appln. No. 10/048,057

Attorney Docket No. T2147-907642

REMARKS

Applicant respectfully requests reconsideration of this application, as amended.

Without concession as to the propriety of the outstanding final rejection, the independent claims have been amended to recite that the server is capable of communicating, via the web server application interface adapter, directly with a first type of WAP application, and via a web container and at least one specific application program interface with a servlet WAP application. Support for these amendments can at least be found in Figures 3 and the accompanying portion of the specification.

In that Stallings fails to teach or suggest the features recited in the independent claims Applicants respectfully submit that claims 1 and 11 are patentably distinguishable therefrom. All claims that depend therefrom are also patentably distinguishable for the above reasons and the additional feature (as) recited therein.

Based on the above, Applicants believe the application is in condition for allowance and respectfully requests the Examiner pass the instant application to issuance.

Should the Examiner believe that any further action is necessary to place this application in better form for allowance, the Examiner is invited to contact Applicants' representative at the telephone number listed below.
